### FAQ

**"Where is it put together?"**

The kit is printed & assembled in the UK and posted to order.

**"I lost the poster!"**

All of the printed parts are also available digitally to download as PDF onto your computer.

**"I dont live in the UK!"**

We also encourage you to create your own kit by sourcing the parts you need locally. However, buying the kit as a whole reduces individual postage of items. However, we strongly reccomend avoiding buying anything from amazon - Jeff

Bezos has enough money.

**"I can't afford one :("**

We want everyone to be able to learn to create expressive interactions with the world around them - So we encourage you to PESTER an educational organisation you know or are a part of to get one.

If not... all the digital projects are completely open source and free, all you need is a computer & internet connection to access them. You can also create most of the projects without the whole kit, or modify any of the projects to work with what you've got.
